

2000 General Education Online Progress Report

Web Spinners Executive Branch (2000-06-06)

Web Spinners is pleased to announce that the General Education Online (GEO) project, is continuing to greatly exceeded our expectations. GEO has been visited over 690,000 times, of which over 205,000 have been unique visitors. GEO has been recognized by the Chronicle of Higher Education, the US Office of Postsecondary Education, and Libraryspot.com for excellence.

GEO has links to over 7,000 different educational facilities in over 160 countries worldwide, making it one of the largest link lists for educational facilities in existence around the world. GEO volunteers continue work on a database backend to the site, scheduled to be added sometime in late 2000.

GEO was originally started in Fall 1995 by Michael Viron of the University of West Florida. Since then, people both on and off campus have volunteered time to keep the site up-to-date, to re-design the logo, and to start initial work on a database prototype.

For additional information concerning GEO, please contact Michael Viron, Project Manager & Primary Developer at mviron@findaschool.org
