

General Education Online Posts First Million Hit Quarter

The Internet (2005-04-09)

General Education Online (GEO) finished analyzing the statistics on its portal for Quarter 1, 2005. During the first three months, GEO posted record totals. For the first time ever, GEO posted a million-plus hit quarter.

GEO ended Quarter 1 with 1.2 million hits, of which 179,252 were unique. The visits accounted for approximately 1 million files, and over 15 GB of Traffic.

Based on the first quarter results, GEO is predicted to pass the 1.5 million hit mark during April, with the possibility of shattering the 3 million hit annual goal set at the beginning of Quarter 1.

GEO experienced record growth of 70% for hits on the site, and 20% growth in unique visitors, continuing the trend of double-digit growth experienced over the last several years.
